

Placement Experience with Xenonstack

Interviewee 1:

OA Round:

- All were aptitude questions difficulty was medium to easy.

Technical task Round:

- 2 task were given to us, and they ask us to complete it before 9pm sharp, task was assigned in morning so roughly we had 10 hours.
- Task 1: We were provided with a theme of renting and selling real state, in which we have to make login/sign up page and one additional page for showcasing the properties. We have to complete frontend + backend + deployment.
- One optional thing was to also implement AI recommendation system in the same app.
- Task 2: was to make a custom Linux command using bash scripting language command was sysopctl which does the basic operations to check system load, uptime, current running process, start and check status for services.

Psychometric test:

- Total 125 questions were there. 80 were based on personality and situation awareness, 25 were on speed response, 20 were based on logical reasoning.

HR:

- Normal behavioral questions was there, what's my family background?
- Are you aware of CTC distribution?
- Do you have any problem with bond?
- Are you comfortable relocating to Mohali?
- Have you done any internship?
