

# Placement Experience with Deloitte

## Interviewee 1:

**Round 1:** Online test on AMCAT platform.

There were 3 sections and there was time limit for each section. All questions were compulsory with no negative marking. Following were the three sections:

**Verbal Reasoning:** errors in sentence, meaning of words, synonyms, comprehension etc.

**Logical Reasoning:** Direction, blood relation, direction, statement and conclusion, coding-decoding etc

**Quantitative Aptitude:** probability, P&C, time and work, profit loss etc

**Round 2:** Just a minute

This round was a JAM round. We were given one topic (on some technology) to speak on. We were supposed to speak at least 60 seconds out of 120 seconds. First 60 seconds were given to think about topic and next 60 for speaking.

You have to cover introduction, pros and cons, opportunity of technology, conclusion.

Goal is to check communication skills.

**Round 3:** Personal interview

The following questions were asked:

- 1) Introduction and About family
- 2) About projects
- 3) If not Deloitte then what is your next plan?
- 4) When you fail in your life how did you handle yourself in that situation
- 5) steps of SDLC
- 6) Are you comfortable to work with people with varied background, skills and behaviour?

## Interviewee 2:

**Round 1:**

Also, the AMCAT test was adaptive i.e. you have to answer all the questions successively and cannot go back to the previous questions and practicing with AMCAT mock tests will help.

**Round 2:**

JAM was basically to test your communication skills and how you are able to present yourself. The topics were like technology and agriculture, impact of Technology in family time (you can find some more on GFG Deloitte experiences).

**Round 3:**

Basically, it was technical + HR

First the interviewer asked about the family background and tell me about yourself. Then asking about the projects I've mentioned in resume. Picked one of them and asked to explain. Then asked some behavioural questions like was there any situation where you had to handle the conflict while doing the project. How did you handle it and more follow up questions based on your answer? Asked my expertise and Questions on one of the subjects of your expertise like DBMS, MySQL etc. At last she asked what do I want to change about my college and then she asked me if I had any questions.
